### Summary

---

I'm a computational biologist specializing in statistical analysis of complex datasets. I am experienced with multiple programming languages as well as a variety of data exploration and visualization techniques. I'm passionate about open science and reproducible research. I'm seeking the opportunity to work on cutting edge research at the frontier of human health.

### Skills and Expertise

---

Research	Computational	Laboratory
Machine learning – Data visualization Gut microbiome – Metagenomics Amplicon sequencing – Statistical analysis – Network analysis Reproducible research	R – R Markdown – Quarto Git/GitHub – Snakemake Conda/mamba – Bash Slurm – Perl – Python	DNA extraction – Library Preparation – Cell Culture – Cloning – Gel electrophoresis – Western blot – PCR

### Education

---

#### PhD Molecular and Cellular Biology

DEPARTMENT OF MICROBIOLOGY

- Advisor: Thomas Sharpton

Oregon State University

2014-2020

#### BS Biological Sciences

COLLEGE OF LIBERAL ARTS AND SCIENCES

- Minor: Mathematics

Arizona State University

2008-2012

### Experience

---

#### Postdoctoral Research Fellow (remote)

SCHLOSS LAB

- Optimizing machine learning models to predict colorectal cancer based on gut microbiome taxonomic abundance
- Identifying early markers of colorectal cancer development in a large clinical cohort of individuals with genetic predisposition to cancer
- Developing curriculum and teaching computational skills to coding beginners in virtual workshops

University of Michigan

2020-present

#### Graduate Research Assistant

SHARPTON LAB

- Metagenomic analysis of gut microbiome samples to quantify associations with health
- Assembly of metagenomic data from gut microbiome samples to build integrated gene catalogues of microbiome genomic diversity
- Collaborate with a diverse group to develop methodology for analyzing microbiome data

Oregon State University

2014-2020

#### Research/Laboratory Assistant

DR. PAUL BOEHMER AND DR. JUI-CHENG HSIEH

- Creation of HSV-1 viral mutants to quantify impact on replication
- Mentor new members of the lab
- Maintain tissue culture and order supplies

University of Arizona

2010-2013
